

//////////*1000+ HACKING TRICKS & TUTORIALS - ebook By Mukesh Bhardwaj Blogger - Paid Version - only @
TekGyd | itechhacks | Mukeshtricks4u*////////

Just a little basic html tip for those who are trying to download an application from sites which has an paypal order page & link to start you off.

Use a proxy when you try this to hide your ip as some sites will record your ip when you connect for security.

- 1) Rightclick your mouse (ctrl+click) viewsource and open the source of the site in an a texteditor
- 2) Search for the word "return"
- 3) Next to it you can find the url for the thank you page
- 4) Copy the url and paste it in your browser and you will see the download link

This works only if you can download instantly after payment, it will not work if the link needs to be emailed to you.

You can try it here to start with:

Code:

<http://www.ramphelp.com/halfpipe.html>

About half way down the page you will find:

```
<input type="hidden" name="return"
value="http://www.ramphelp.com/65984523/thanks/68912hp654/26865thankyouhp08363215423.html ">
```

Copy the link into your browser and download.
