A HACKER is someone who likes to tinker with electronics or computer systems.
Hackers like to explore and learn how computer systems work, finding ways to make them do what they do better,
or do things they weren't intended to do.

types of hackers:

1) White Hat:

?These are considered the GOOD guys. White hat hackers don't use their skills for illegal purposes.
?They usually become Computer Security experts and help protect people from the Black Hats.
?They are also called as ETHICAL HACKERS.

2) Black Hat:

?These are considered the BAD guys.
?Black hat hackers usually use their skills maliciously for personal gain.
?They are the people who hack banks, steal credit card information and deface websites.
?They are also called as CRACKERS.
