Would you Like to Know your mobile is original or not?!!! if you agree than be carefully read the following given instructions.

Firstly Type \*#06# for your IMEI number.

You can see your mobile phone IMEI number on the backside cover of the mobile.

After when you enter the code you will see a new code that contains only 15 digits.For example 358472042445412

If the digit number seven and eight is 02 or 20 then that means it was Assembly on Emirates which is very bad quality Sad.

If the seventh and eighth digits are either 03/30 or 04/40, this indicates your phone is made in China but its quality is good. But not good either as 00, 01 or 10.

If the seventh and eighth digits are 05 or 50 this indicates your cell phone is manufactured either in Brazil or USA or Finland.

If the seventh and eighth digits are 06 or 60 this indicates your cell phone is manufactured either in Hong Kong, or China or Mexico.

If the digit Seven and eight is 08 or 80 then that means it's manufactured in Germany which is not bad.

If the digit number seven and eight is 01 and 10 then that means it's manufactured in Finland which is Good.

If the digit number seven and eight is 00 that's means it's manufactured in France which is the best Mobile Quality.
