Application and Boot life Derrag	
/////////*1000+ HACKING TRICKS & TUTORIALS - ebook By Mukesh Bhardwaj Blogger - Paid Version - or ekGyd itechhacks Mukeshtricks4u*//////	ıly @

This type of defrag pushes all commonly used programs and boot files to the edge of the hard drive for faster access. Windows XP normally schedules this every three days when it is idle, however you can force it to do this by useing the b switch anytime

i.e defrag c: -b
