+++How To Unlock an Android Pattern:+++

Today many android phone user use the inbuilt unlock pattern for
security of there smartphones.... This is very easy to use but some
times after many wrong attempts the phone locks permanently...
After that you need to enter the user id you enter in the google play
store to unlock phone but there are some problems to unlock it again if
u stop data usage.. so it is not connected to the internet and then
you cannot unlock the phone without this trick. Sometime user
needs to go toSamsung care center and then give some money to
unlock it again so this is costly you need to pay here we are going to
give you the steps to unlock your phone.

Just follow these simple steps to unlock your phone and use again
free of cost.
> >>Enter the user email id you enter in the play store.
>>>If you don't know the email id. Then just don't worry just follow these steps.
>>> Switch off your android and then wait for a while to switch it back on.
>>> Then first click Up Volume Key and hold it. then click on Home button and hold it.
>>> Then press the power button and after is started just release it.
>>> Then you can view the secret android menu you never have seen before....
>>> Just click on home button for up and down in the menu...
>>> Then just go to third option named as DELETE ALL USER DATA. then it takes some time.
>>> The phone will restart and the unlock patter problem is fixed.

But the main problem is resetting the phone.... But it is the one and
only trick to regain access to your
